

TOWN OF KURE BEACH
STORMWATER COMMITTEE MEETING MINUTES
June 12, 2007

To: Kure Beach Town Council
Department Heads
Committee Members

From: Eric Vann

1. The Kure Beach Stormwater Committee met on June 12, 2007 with the following in attendance:

Mac Montgomery
Sonny Beeker
Karen Vatr
Ted Gragg
Barry Nelder
Eric Vann
Vinny Doran

2. Sonny Beeker gave a report on the Stormwater Mapping Project which has been completed and installed on GIS software. Sonny showed portions of the map indicating drains and outfalls on a map overlay on his laptop PC.
3. Mac Montgomery provided some insight on DOT plans to fund materials for installing dune infiltration systems for two more outfalls at the pier and walkway near the pier. Are still waiting on Mike NCSU to get this system certified as a Stormwater BMP so we can obtain additional grant monies to cover the remaining outfalls.
4. Eric Vann handed out portions of the Kure Beach Phase II Permit which listed the 50 items the town is obligated to perform at various times over the next 5 years. A number of these items have been completed and a few others are an integral part of the Universal Stormwater Ordinance which should be approved in September. We must now begin documenting the activities.
5. Mr. Joe Trulove representing Beachwalk Subdivision asked the committee to look into the possibility of the Town taking on some of the responsibility of maintaining the two sediment ponds in Beachwalk as over 50% percent of drainage is for areas outside of the subdivision. He provided one NCDHNER permit covering a portion of the system. The committee agreed to review the situation.

6. A motion was made by Eric Vann that we request the council to have a Public Hearing on the Proposed Universal Stormwater Ordinance on July 17, just prior to the Council Meeting to allow more time to get Town Department Heads and DWQ staff up to speed on what will be required for permitting effective September 1.
7. The next meeting is scheduled for July 10 at 5pm.
