

Kure Beach Storm Water Committee
Meeting Minutes for October 9, 2007

Attending: Karen Vattr, Mac Montgomery, Jim Dugan, and Eric Vann

Items discussed were as following:

1. Karen discussed plans for the joint booth with Carolina Beach for the Seafood and Jazz Festival.
2. Eric suggested that the town consider developing a Storm Water Master Plan in conjunction with a consulting firm that would provide estimated costs of the various projects either identified by committee members, town staff and the consultants. In addition the consultants would prioritize the projects to provide the highest benefit per dollar cost. Mac provided Eric with several contacts for possible grant monies for the study.
3. Karen stated that Seawatch Homeowners request that the ocean outfall at Seawatch be considered for the next installation of the dune infiltration system. Mac stated DOT was providing funds for the next system for the two outfalls at the end of K Ave. After that project no funding is currently available since we are waiting on NCSU to get the systems approved as a BMP in the State Manual.
