

The Kure Beach Storm Water Committee met on 12/6/07 at Town Hall at 5:00pm.

Attending were: Eric Vann, Karen Vatr, Ted Gragg and Vinny Doran

Karen Vatr presented a proposal to hold a Landscaping & Storm Water presentation at the Aquarium on 1/30/08. Peggy Sloan, education coordinator, would conduct the program targeted at homeowners and local landscapers. She also hopes to get a Landscape Architect who lives in Kure Beach to assist. Karen would arrange for invitations to landscapers and putting info in newspaper and Town Newsletter. Motion was made and carried to hold this event. This event would help satisfy our Public Education and Outreach requirements of our Phase II permit.

Joe Truelove of Beachwalk HOA advised members he had received documents that had been promised and was advised he was to get requested drawings soon. Joe had previously provided the committee with documents he had relating to the transfer of storm water from Kure Dunes to the Beachwalk retention pond.

Eric Vann submitted a proposal to move forward with a grant application to the Clean Water Management Trust Fund for a Storm water Master Plan that would be a guiding document for future storm water projects. Motion was made and carried to go forward. Eric is to work with Sonny in getting a Consultants cost estimate. Must have CWMTF grant request in before by 2/1/08 to get funds in next year. (Copy of Proposal is attached)

Eric Vann advised members that the Town must prepare a "Comprehensive Storm Water Management Program Report" as part of the requirements of the Town's Phase II permit. This report will cover the period from March 1, 2007 through February 28, 2008. [A copy of the Instructions (16 pages) provided by Division of Water Quality is attached.] This is a very comprehensive report and requires data on many more subjects than those covered in Phase II Permit.
