Storm Surge Inundation by Hurricane Category

- Category 1 and 2
- Category 3
- Category 4 and 5

Storm Surge data depicted in this map comes from the National Hurricane Center and is based on SLOSH models (Sea, Lake, and Overland Surges from Hurricanes) for the North Carolina coast. The Storm Surge data used for the purposes of this map utilize the "FAST" moving hurricane model (those with forward velocities greater than 15mph).

The preparation of this map was financed in part through a grant provided by the North Carolina Coastal Management Program, through funds provided by the Coastal Zone Management Act of 1972, as amended, which is administered by the office of Ocean and Coastal Resources Management, National Oceanic and Atmospheric Administration.
